DETAILED ACTION

Response to Arguments

1. This Office action is in response to applicant's paper filed 7/1/2005. **Claims 1-9 and 11-21** as amended are still in consideration for this application.

2. Examiner **withdraws** the obviousness rejection(s) to *Lin* in view of *Hoshi* and corresponding rejections. Applicant's claim amendments overcome the prior cited art. Unfortunately, the claims as amended are further rejected for lacking patent eligibility under 35 U.S.C. 101 since applicant only claims a data structure per se. Please see the new rejection below. As the examiner did not catch the new rejection until now, the current rejection is made non-final. No further art was found to reject the amended claims.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-9 and 11-14 are rejected under 35 U.S.C. 101 because the independent claims 1 and 9 are directed towards a data structure per se and thus do not have any pre or post computing process activity (i.e., a compare circuit is a data structure such as a CAM). Claims 2-9 and 12-14 are rejected for depending on a rejected base claim.

Allowable Subject Matter

4. **Claims 15-21** are allowed.
